**Subject:** Link to maps

Jerry,

I have attached a link to the Utah Geologic Survey where you can access the 7.5 minute quad maps. It is:

<http://geology.utah.gov/maps/topomap/index.htm> There are a number of other maps that you can access from the UGS website. You may want to go to their home page and navigate through their site that says "Maps Online". There is also another site that the Division of Water Rights Maintains. It is found at the following link:

<http://www.waterrights.utah.gov/quads/default.htm>

I hope this helps you with your mapping needs. Lynn should be back next week and I am sure he can help you. If this isn't what you are looking for, let us know. Good Luck!
